SUMMARY

Third-year B.Tech Computer Science student at VIT Vellore with a **CGPA of 9.15**. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, and C/C++. Completed a Software Development Internship building backend services using Node.js, Express.js, MongoDB, and REST APIs. Passionate about software engineering, distributed systems, networking technologies, and solving complex algorithmic problems.

EDUCATION

VIT Vellore <i>B.Tech in Computer Science</i> CGPA: 9.15 / 10	Vellore, India 2024 – 2028
---	-------------------------------

EXPERIENCE

Konnichiwow <i>Software Development Intern</i> - Developed backend modules using Node.js, Express.js, and MongoDB for production web applications. - Designed and implemented RESTful APIs with request validation and error handling to improve application reliability. - Optimized database operations for structured and semi-structured data using MongoDB. - Collaborated with developers using Git-based workflows in an Agile software development environment.	VIT Vellore Sept 2025 – Nov 2025
--	-------------------------------------

ACHIEVEMENTS

Academic: Maintained a CGPA of 9.12 across the first four semesters of B.Tech.

Competitive Programming:

- LeetCode: Solved 210+ problems
- Codeforces: Rating 866

Hackathon: Selected for Round 2 of **Flipkart GridLock Hackathon 2.0** in collaboration with Bengaluru Traffic Police.

Exams: Secured 93 percentile in JEE Main and 98 percentile in MHT-CET (2024).

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Computer Organization & Architecture

Backend Development: Node.js, Express.js, MongoDB, REST APIs

Web Development: React.js, HTML, CSS

Developer Tools: Git, GitHub, Linux, VS Code, Postman

PROJECTS

Brain Dump Board <i>JavaScript, HTML, CSS</i> - Developed a productivity web application to organize notes, tasks, and schedules with an intuitive drag-and-drop workflow. - Implemented role-based access control, task assignment, priority management, and progress tracking. - Designed a responsive UI and optimized client-side state management using LocalStorage for persistent data storage.	GitHub
9 Pointer <i>React.js</i> - Built a React-based platform to organize academic resources by branch, year, and subject. - Designed reusable React components and responsive layouts for improved scalability and maintainability. - Deployed the application using GitHub Pages for public access.	GitHub
